Bonafide Website Pricing Guide

For the developer and Bonafide team | October 2026

Use this guide to add verification packages and prices to the website for testing. Prices need management approval before launch. Show Bonafide as responsible for all checks, reports and customer updates; agents and lawyers are handled internally.

1. Packages to display

Package	Price in USD	What the customer gets
Basic	$25	One visit, brief local enquiries, photos or video where needed, and a short report.
Standard	$60	Everything in Basic, plus a land registry check, court records search and local intelligence gathering, with a detailed report.
Premium property	$100–$200	Everything in Standard, plus a property valuation and a feasibility report on the property's intended use. Final quote before payment.
Weekly subscription	$35 per week	1 site visit and 1 report per week.
Monthly subscription	$60 per month	2 site checks and 1 report per month.
Quarterly subscription	$200 every 3 months	3 site checks and 1 report every 3 months.

One check covers one location in an agreed service area. Premium uses "Request a quote" so Bonafide can confirm the exact price before payment. Subscriptions require a completed Standard or Premium verification for that site and Bonafide's confirmation of the customer's authority for repeat visits. Extra work needs a quote.

2. Paying in dollars or naira

Display package prices in US dollars. At checkout, customers can choose to pay in dollars or naira, depending on the payment options enabled.

If the customer chooses naira, convert the dollar price using the exchange rate set by Bonafide. Show the rate and final naira total before payment. Bonafide should be able to update the rate; dollar package prices stay the same.

Checkout note: "Prices are listed in US dollars. If you choose to pay in naira, your total will be converted to naira at checkout before you pay."

3. What the developer should set up

- Store prices in dollars; allow Bonafide to edit prices and the exchange rate.
- Use test payments during development. Basic is $25 in total, including service and transport allowance.
- Allow subscriptions only after Standard or Premium verification is completed for the site and Bonafide confirms authority for ongoing visits.
- Track site visits and reports separately: weekly 1 visit/1 report; monthly 2 checks/1 report; quarterly 3 checks/1 report. Activate the paid period after confirmed payment.
- Renew only with consent. Cancellation stops the next renewal. Unused visits expire at period end unless Bonafide caused the delay.
- Subscription prices remain proposed and need review against the new service counts.
